KVM Switch 2 to 1

Details correct on: 09/12/2014

Notification	
Product Code	KVM-201
Short Description	KVM Switch 2 to 1 (2 users to one PC)
Full Description	The KVM-201 CPU Switch Box is a computer-sharing device that allows two users to share one Computer. Based on the First-come-first-served principle, the KVM-201 automatically switches to the console that is first activated, by keystroke or mouse movement. This multi-user-single-tasking device is a perfect solution for a small office environment where a PC can be shared between two users without the trouble of a network. There is no interface card or software to configure. Installation is as easy as connecting cables between the CPU Switch and your computers. Operation is as simple as pressing buttons, entering hot-key command. The KVM CPU Switch is independent of computer operating systems. Rextron
